

UCMUG SATELLITE
PLEASANT HILL, TN
MARCH 29, 2008
4PM BOYCE HALL
UNITED CHURCH OF CHRIST

At four pm, Warner Seibert opened the meeting projecting on the big screen one of his favorite software programs - EasyEnvelopes. This program is a widget installed in Dashboard under the 10.4 operating system. EasyEnvelopes is linked to the address book and when an address is selected and the graphic stamp is clicked the envelope is printed.

Before proceeding further Warner introduced the UCMUG officers who were present. President, Bob Weaver took the opportunity to acquaint attendees with UCMUG, its services and programs. Warner had received some questions via his email questionnaire for any problems we might have. These were brought up - followed by how to enlarge or reduce the size of email attachments for printing. Also - To get a picture to the desktop, just select and drag it. A projected on screen review for changing AppleWorks functions via its preferences was shown.

Phil Buchanan, an expert collector of music was introduced. He showed how he records music from iTunes and many other sources. He showed how to change iTunes to MP3s by going to iTunes preferences and select import MP3. Attendees, because of their varied experiences, showed how to easily it is to turn off the music when answering a ringing phone. One member volunteered that the web site of Berea College in Kentucky has an online library available with early mountain, country, and native religious music sung and performed with native made instruments during the late 1700s and 1800s by the settlers.

Much interest and many questions were further answered until 5:45 pm.

Report respectfully submitted by: Rog Westlake, Secretary

MEMBER ATTENDANCE:

10 Single + 3 Family

Shirley Berry sberry30@frontiernet.net
